

**superbag**

Committed to innovation

# Superbag and You

Working together to improve  
our environment!

# The Superbag Sustain-a-bag program

**Together, let's keep our world green!**

Every part of the bag can be reused and recycled into different plastic products!

**Our Sustain-a-bag program makes it simple!**

Superbag will buy back your bags and plastic wrap and will put a percentage of the recycled product back into your bags or other specialty recycled products.

# Initial Start Up

- Tool Kits for recycling of bags to be supplied and provided at store
- Recycling Bins for bag collection to be supplied and located at stores
- Signage for Recycling of bags supplied and located at stores

# Bale Specifications

- Bales must contain at least 85% grocery bags, and <15% other PE film
- Bales must weigh at least 950 Lbs.
- Bales must be strapped in a secure manner so as to not lose its integrity during shipping
- Material that should not be in plastic bag bale are as follows: PETE, PP, PVC, PVDC, PS, PU, CORRUGATED, LOOSE PAPER, BUBBLE WRAP ETC...
- No medical waste is acceptable
- Bales must be dry, no moisture

# Logistics

- Bags will be collected at each store and baled in the back warehouse separate of other recyclables
- Baled bags will the be hauled back to the distribution center where they will be held in a dry area or shipping container if space is not available
- When adequate volume is achieved, Superbag will coordinate trucking and have the material picked up.

# Why Superbag

*Unlike brokers or other companies that want to source the bag, Superbag is the manufacturer of the bag. The material is not going overseas. It is coming back to our plant for recycling.*

- We will be bringing the bag back to life.
- We will be turning it into another bag.
- We will be reducing the volume needed of prime materials in the manufacturing of grocery bags.

# CONCLUSION

Superbag's commitment is to provide the customer with the highest quality bag at the best value and with the smallest carbon footprint!

Our goal is to make a change in the plastic industry by using the maximum post consumer recycled material back into our bags. We believe with the help of partners like you, this can and will be achieved!
